ART UNIT 2872

Art Unit: 2872

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Courtney J. Miller on 08/20/2007.

2. The application has been amended as follows:

In claim 48, line 1, the language "flexible" has been changed to read --adjustable--.

Claims 11-20 and 22-40 have been canceled.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a system for creating a colorful spectral display comprising (a) an array of prismatic elements, wherein each prismatic element in the array further comprises a substantially solid light-dispersing medium; a highly reflective surface attached to the light-dispersing medium, wherein the highly reflective surface is planar; and a window formed in the light-dispersing medium at a predetermined angle relative to the highly reflective surface, wherein the window is planar and further includes a clear, polished surface, and wherein the angle of the reflective surface relative to the window is fixed; and (b) at least one source of white light directed at the windows of the prismatic elements, wherein the white light enters the prismatic elements through the windows, wherein the light-dispersing medium in each prismatic element disperses the white light into a spectrum of visible colors, and wherein the highly reflective surfaces in the prismatic elements reflect at least a portion of the dispersed white light back out of the prismatic elements through the windows thereof for creating
